HYBRID COURSES

A hybrid course is a course that combines approximately 50% face-to-face instruction with 50% online computer based learning. A significant part of the course learning is online and the amount of classroom seat-time is reduced; the course content and course work does not change with hybrid status, it remains the same. Some computer and technical skills are necessary in order to succeed in a hybrid course. Before taking a hybrid course it is recommended that students are competent at the CS112 Introduction to Computers level.
